CARBOHYDRATE RESEARCH

Subject index

N-Acylaminoethyl lactoside
Synthesis of amphiphilic lactosides that possess a lactosylceramide-mimicking *N*-acyl structure: Alternative universal substrates for *endo*-type glycosylceramidases 193

Alditol-1-*C*-ylfuran derivatives
Photooxygenation of alditol-1-*C*-yl derivatives of furan with singlet oxygen 179

Alditols
Solvent effects on the complexation of trivalent lanthanide cations by sugars and alditols: Chromatography–calorimetry comparison 1

Aldose reductase
Catalysis of reduction of aldos-2-uloses ('osones') by aldose reductase: selectivity for the aldehydic carbonyl group 77

Aldosulose
Catalysis of reduction of aldos-2-uloses ('osones') by aldose reductase: selectivity for the aldehydic carbonyl group 77

Alginate lyase
NMR spectroscopy analysis of oligoguluronates and oligomannuronates prepared by acid or enzymatic hydrolysis of homopolymeric blocks of alginic acid. Application to the determination of the substrate specificity of *Haliotis tuberculata* alginate lyase 11

Alginic acid
NMR spectroscopy analysis of oligoguluronates and oligomannuronates prepared by acid or enzymatic hydrolysis of homopolymeric blocks of alginic acid. Application to the determination of the substrate specificity of *Haliotis tuberculata* alginate lyase 11

Amiprilose analogues
Efficient synthesis of 6-thio and 3-thio analogues of Amiprilose and related compounds 171

Amphiphilic lactoside
Synthesis of amphiphilic lactosides that possess a lactosylceramide-mimicking *N*-acyl structure: Alternative universal substrates for *endo*-type glycosylceramidases 193

Anticoagulant activity
Anticoagulant low molecular weight fucans produced by radical process and ion exchange chromatography of high molecular weight fucans extracted from the brown seaweed *Ascophyllum nodosum* 201

ω-Camphanates
Synthesis and resolution of 1,5-di-*O*-benzyl-2,3-*O*-isopropylidene-4-*O*-*p*-methoxybenzyl-*myo*-inositol 163

N^2-(1-Carbamoylalkyl)-guanosine
Reaction of guanosine with glucose, ribose, and glucose 6-phosphate 55

Carbohydrate oxidation
Photooxygenation of alditol-1-*C*-yl derivatives of furan with singlet oxygen 179

Carbohydrates
The reaction of the peracetate methyl esters of *N*-acetylneuraminic acid (Neu5Ac), 3-deoxy-D-*glycero*-D-*galacto*-2-nonulosonic acid (Kdn), and 3-deoxy-D-*manno*-2-octulosonic acid (Kdo) with trimethylsilyl trifluoromethanesulfonate 67

N^2-(1-Carboxyalkyl)-guanosine
Reaction of guanosine with glucose, ribose, and glucose 6-phosphate 55

Ceramide glycanase
Synthesis of amphiphilic lactosides that possess a lactosylceramide-mimicking *N*-acyl structure: Alternative universal substrates for *endo*-type glycosylceramidases 193

Chitin
Competitive binding of highly de-*N*-acetylated chitosans and *N*,*N*′-diacetylchitobiose to lysozyme from chicken egg white studied by ^{1}H NMR spectroscopy 143

Chitin-oligosaccharides
Competitive binding of highly de-*N*-acetylated chitosans and *N*,*N*′-diacetylchitobiose to lysozyme from chicken egg white studied by ^{1}H NMR spectroscopy 143

Chitosan
Competitive binding of highly de-*N*-acetylated chitosans and *N,N'*-diacetylchitobiose to lysozyme from chicken egg white studied by ^{1}H NMR spectroscopy 143
Competitive binding
Competitive binding of highly de-*N*-acetylated chitosans and *N,N'*-diacetylchitobiose to lysozyme from chicken egg white studied by ^{1}H NMR spectroscopy 143
Craterostigma plantagineum
NMR structural analysis of a tri-*O*-isopropylidene derivative of D-*glycero*-D-*ido*-2-octulose, the major sugar found in the resurrection plant *Craterostigma plantagineum* 137
Cyclic structure
Conformation of cyclic and linear (1 → 2)-β-D-glucans in aqueous solution 25

Enantiopure *myo*-inositol derivatives
Synthesis and resolution of 1,5-di-*O*-benzyl-2,3-*O*-isopropylidene-4-*O*-*p*-methoxybenzyl-*myo*-inositol 163
Endoglycoceramidase
Synthesis of amphiphilic lactosides that possess a lactosylceramide-mimicking *N*-acyl structure: Alternative universal substrates for *endo*-type glycosylceramidases 193

Fucan
Anticoagulant low molecular weight fucans produced by radical process and ion exchange chromatography of high molecular weight fucans extracted from the brown seaweed *Ascophyllum nodosum* 201
Furan derivatives
Photooxygenation of alditol-1-*C*-yl derivatives of furan with singlet oxygen 179

D-Glucose
Reaction of guanosine with glucose, ribose, and glucose 6-phosphate 55
D-Glucose 6-phosphate
Reaction of guanosine with glucose, ribose, and glucose 6-phosphate 55
Glycal
The reaction of the peracetate methyl esters of *N*-acetylneuraminic acid (Neu5Ac), 3-deoxy-D-*glycero*-D-*galacto*-2-nonulosonic acid (Kdn), and 3-deoxy-D-*manno*-2-octulosonic acid (Kdo) with trimethylsilyl trifluoromethanesulfonate 67
Glycosuloses
Photooxygenation of alditol-1-*C*-yl derivatives of furan with singlet oxygen 179

Haliotis tuberculata
NMR spectroscopy analysis of oligoguluronates and oligomannuronates prepared by acid or enzymatic hydrolysis of homopolymeric blocks of alginic acid. Application to the determination of the substrate specificity of *Haliotis tuberculata* alginate lyase 11
Hemicellulose
Purification and characterisation of a major xylanase with cellulase and transferase activities from *Fusarium oxysporum* 91
^{1}H NMR spectroscopy
Competitive binding of highly de-*N*-acetylated chitosans and *N,N'*-diacetylchitobiose to lysozyme from chicken egg white studied by ^{1}H NMR spectroscopy 143
Hydrolytic stability
Transition metal saccharide chemistry and biology: Synthesis, characterization, electrochemistry and EPR studies of oxovanadium(IV) complexes of saccharides and their derivatives and in vitro interaction of some of these with ribonuclease and deoxyribonuclease 39

1D-*myo*-Inositol 1,2,4,6-tetrakisphosphate
Synthesis and resolution of 1,5-di-*O*-benzyl-2,3-*O*-isopropylidene-4-*O*-*p*-methoxybenzyl-*myo*-inositol 163
1D-*myo*-Inositol 1,4,5-trisphosphate receptor
Synthesis and resolution of 1,5-di-*O*-benzyl-2,3-*O*-isopropylidene-4-*O*-*p*-methoxybenzyl-*myo*-inositol 163
In vitro RNase inhibition
Transition metal saccharide chemistry and biology: Synthesis, characterization, electrochemistry and EPR studies of oxovanadium(IV) complexes of saccharides and their derivatives and in vitro interaction of some of these with ribonuclease and deoxyribonuclease 39
Ion exchange chromatography
Anticoagulant low molecular weight fucans produced by radical process and ion exchange chromatography of high molecular weight fucans extracted from the brown seaweed *Ascophyllum nodosum* 201

Kdn
The reaction of the peracetate methyl esters of *N*-acetylneuraminic acid (Neu5Ac), 3-deoxy-D-*glycero*-D-*galacto*-2-nonulosonic acid (Kdn), and 3-deoxy-D-*manno*-2-octulosonic acid (Kdo) with trimethylsilyl trifluoromethanesulfonate 67
Kdo
The reaction of the peracetate methyl esters of *N*-acetylneuraminic acid (Neu5Ac), 3-deoxy-D-*glycero*-D-*galacto*-2-nonulosonic acid (Kdn), and 3-deoxy-D-*manno*-2-octulosonic acid (Kdo) with trimethylsilyl trifluoromethanesulfonate 67

Ketose
Catalysis of reduction of aldos-2-uloses ('osones') by aldose reductase: selectivity for the aldehydic carbonyl group 77

Lactosylceramide analogue
Synthesis of amphiphilic lactosides that possess a lactosylceramide-mimicking *N*-acyl structure: Alternative universal substrates for *endo*-type glycosylceramidases 193
Lanthanide cations, complexation of
Solvent effects on the complexation of trivalent lanthanide cations by sugars and alditols: Chromatography–calorimetry comparison 1
Lysozyme
Competitive binding of highly de-*N*-acetylated chitosans and *N*,*N*′-diacetylchitobiose to lysozyme from chicken egg white studied by ^{1}H NMR spectroscopy 143

Me_2SO, acetonitrile, methanol, *tert*-butanol, water, mixtures of
Solvent effects on the complexation of trivalent lanthanide cations by sugars and alditols: Chromatography–calorimetry comparison 1
Microcalorimetry
Solvent effects on the complexation of trivalent lanthanide cations by sugars and alditols: Chromatography–calorimetry comparison 1
Mode of action
NMR spectroscopy studies of the action pattern of tomato pectinesterase: generation of block structure in pectin by a multiple-attack mechanism 105
Monte Carlo simulation
Conformation of cyclic and linear (1 → 2)-β-D-glucans in aqueous solution 25

N-acetylneuraminic acid
The reaction of the peracetate methyl esters of *N*-acetylneuraminic acid (Neu5Ac), 3-deoxy-D-*glycero*-D-*galacto*-2-nonulosonic acid (Kdn), and 3-deoxy-D-*manno*-2-octulosonic acid (Kdo) with trimethylsilyl trifluoromethanesulfonate 67
NMR
NMR spectroscopy analysis of oligoguluronates and oligomannuronates prepared by acid or enzymatic hydrolysis of homopolymeric blocks of alginic acid. Application to the determination of the substrate specificity of *Haliotis tuberculata* alginate lyase 11
Nod factor
Structural determination of symbiotic nodulation factors from the broad host-range *Rhizobium* species NGR234 115

D-*glycero*-D-*ido*-2-Octulose
NMR structural analysis of a tri-*O*-isopropylidene derivative of D-*glycero*-D-*ido*-2-octulose, the major sugar found in the resurrection plant *Craterostigma plantagineum* 137
Oligoguluronates
NMR spectroscopy analysis of oligoguluronates and oligomannuronates prepared by acid or enzymatic hydrolysis of homopolymeric blocks of alginic acid. Application to the determination of the substrate specificity of *Haliotis tuberculata* alginate lyase 11
Oligomannuronates
NMR spectroscopy analysis of oligoguluronates and oligomannuronates prepared by acid or enzymatic hydrolysis of homopolymeric blocks of alginic acid. Application to the determination of the substrate specificity of *Haliotis tuberculata* alginate lyase 11
Osone
Catalysis of reduction of aldos-2-uloses ('osones') by aldose reductase: selectivity for the aldehydic carbonyl group 77
Oxovanadium(IV)–saccharide complexes
Transition metal saccharide chemistry and biology: Synthesis, characterization, electrochemistry and EPR studies of oxovanadium(IV) complexes of saccharides and their derivatives and in vitro interaction of some of these with ribonuclease and deoxyribonuclease 39

Pectin
NMR spectroscopy studies of the action pattern of tomato pectinesterase: generation of block structure in pectin by a multiple-attack mechanism 105
Pectinesterase
NMR spectroscopy studies of the action pattern of tomato pectinesterase: generation of block structure in pectin by a multiple-attack mechanism 105
2,3,3′,4,4′-Penta-*O*-acetylsucrose
Some studies on the selective synthesis of sucrose acetates using template and random trityl chloride functionalised macroporous polymers 151
2,3,3′,4,4′-Penta-*O*-acetyl-1′,6,6′-tri-*O*-vinyltrityl-sucrose
Some studies on the selective synthesis of sucrose acetates using template and random trityl chloride functionalised macroporous polymers 151

Polygalacturonic acid
NMR spectroscopy studies of the action pattern of tomato pectinesterase: generation of block structure in pectin by a multiple-attack mechanism 105

Radical process degradation
Anticoagulant low molecular weight fucans produced by radical process and ion exchange chromatography of high molecular weight fucans extracted from the brown seaweed *Ascophyllum nodosum* 201
Random trityl chloride functionalised macroporous polymer
Some studies on the selective synthesis of sucrose acetates using template and random trityl chloride functionalised macroporous polymers 151
Resurrection plant
NMR structural analysis of a tri-*O*-isopropylidene derivative of D-*glycero*-D-*ido*-2-octulose, the major sugar found in the resurrection plant *Craterostigma plantagineum* 137
Rhizobium
Structural determination of symbiotic nodulation factors from the broad host-range *Rhizobium* species NGR234 115

Seaweed
Anticoagulant low molecular weight fucans produced by radical process and ion exchange chromatography of high molecular weight fucans extracted from the brown seaweed *Ascophyllum nodosum* 201
Sensitized photooxygenation
Photooxygenation of alditol-1-*C*-yl derivatives of furan with singlet oxygen 179
Sequential structure
NMR spectroscopy studies of the action pattern of tomato pectinesterase: generation of block structure in pectin by a multiple-attack mechanism 105
Sialic acid
The reaction of the peracetate methyl esters of *N*-acetylneuraminic acid (Neu5Ac), 3-deoxy-D-*glycero*-D-*galacto*-2-nonulosonic acid (Kdn), and 3-deoxy-D-*manno*-2-octulosonic acid (Kdo) with trimethylsilyl trifluoromethanesulfonate 67
Small-angle X-ray scattering
Conformation of cyclic and linear (1 → 2)-β-D-glucans in aqueous solution 25
Stability constants
Solvent effects on the complexation of trivalent lanthanide cations by sugars and alditols: Chromatography–calorimetry comparison 1
Structural determination
Structural determination of symbiotic nodulation factors from the broad host-range *Rhizobium* species NGR234 115
Substrate specificity
NMR spectroscopy analysis of oligoguluronates and oligomannuronates prepared by acid or enzymatic hydrolysis of homopolymeric blocks of alginic acid. Application to the determination of the substrate specificity of *Haliotis tuberculata* alginate lyase 11
Sugars
Solvent effects on the complexation of trivalent lanthanide cations by sugars and alditols: Chromatography–calorimetry comparison 1
Synthesis
Simple synthesis of 6-thioglycopyranoses. Synthesis of 1,2,3-tri-*O*-acetyl-6-*S*-acetyl-4-*O*-benzoyl-6-thio-α-D-galactopyranose 189

Template technique
Some studies on the selective synthesis of sucrose acetates using template and random trityl chloride functionalised macroporous polymers 151
6-Thio-α-D-galactopyranose
Simple synthesis of 6-thioglycopyranoses. Synthesis of 1,2,3-tri-*O*-acetyl-6-*S*-acetyl-4-*O*-benzoyl-6-thio-α-D-galactopyranose 189
Thio sugars
Efficient synthesis of 6-thio and 3-thio analogues of Amiprilose and related compounds 171
Simple synthesis of 6-thioglycopyranoses. Synthesis of 1,2,3-tri-*O*-acetyl-6-*S*-acetyl-4-*O*-benzoyl-6-thio-α-D-galactopyranose 189
Tin-mediated benzylation
Synthesis and resolution of 1,5-di-*O*-benzyl-2,3-*O*-isopropylidene-4-*O*-*p*-methoxybenzyl-*myo*-inositol 163
TLC
Solvent effects on the complexation of trivalent lanthanide cations by sugars and alditols: Chromatography–calorimetry comparison 1
Transition metal–saccharide chemistry
Transition metal saccharide chemistry and biology: Synthesis, characterization, electrochemistry and EPR studies of oxovanadium(IV) complexes of saccharides and their derivatives and in vitro interaction of some of these with ribonuclease and deoxyribonuclease 39
Transition-state analogues
Transition metal saccharide chemistry and biology: Synthesis, characterization, electrochemistry and EPR studies of oxovanadium(IV) complexes of saccharides and their derivatives

and in vitro interaction of some of these with ribonuclease and deoxyribonuclease 39

Ulosonic acids
The reaction of the peracetate methyl esters of *N*-acetylneuraminic acid (Neu5Ac), 3-deoxy-D-*glycero*-D-*galacto*-2-nonulosonic acid (Kdn), and 3-deoxy-D-*manno*-2-octulosonic acid (Kdo) with trimethylsilyl trifluoromethanesulfonate 67

Xylanase
Purification and characterisation of a major xylanase with cellulase and transferase activities from *Fusarium oxysporum* 91
